### Classification System

- Consumer Demand  
Production Economics and Supply  
Agricultural Products: price analysis, sub-sector models, marketing, futures  
Agricultural Inputs: land, labor, finance  
Natural Resources: energy, conservation, land use, water, forestry, fisheries  
Environmental Economics: pollution, regulation, nonmarket valuation  
Agricultural and Food Policy: regulation, taxation, welfare  
Economic Development: developing economies, aid, regional, general equilibrium  
International Economics: trade, integration  
Industrial Organization and Market Structure  
General: teaching, extension, research methodology, professional
